

LOCK FOCUS G LOCK

fire hydrant security

EASY TO INSTALL AND WITH AN INBUILT BARREL, THE **G LOCK** IS THE NEWEST PRODUCT IN HYDRANT SECURITY

APPLICATION

- Ideal for securing exposed fire hydrants in public and high traffic areas

FEATURES

- Easy to install clamping lock
- In-built barrel eliminates the extra cost of securing your hydrant with padlock
- Snap lock hinge design provides a cut-away point in case of emergency

KEYING

- The Lock Focus G Lock comes with L003 keying and is provided with 1 key to suit fire brigade standards
- Additional L003 keys can be provided upon request

MATERIALS

- Lightweight and durable polypropylene
- UV and light stabilizers have been added to the material to increase product life in exposed areas
- Weatherfast pigment additives to prolong colour life

The Lock Focus G Lock is a simple but effective development in hydrant security. By incorporating our L003 barrel, vandals no longer have an easy access point to break into the hydrant and you don't have the additional cost of a padlock to secure your product.
