

WORK SMARTER... NOT HARDER!
MACHINE SERVICING
SERVICE QUOTING
01/7/2025

We would like to take a moment to explain our machine quote fee of **\$250 per machine**, which is applied when assessing equipment for repair or refurbishment. To provide an accurate and detailed quote, each machine requires a thorough diagnostic process.

This includes:

- Full removal of the motor from the machine housing
- Inspection and testing of the foot switch, forward/reverse switch, and all associated cabling
- Wiring continuity testing
- General cleaning and lubrication of all moving parts
- Visual and mechanical inspection of internal components

This diagnostic process typically takes a minimum of two hours per unit.

Please note that this does not include the cost of any replacement parts that may be identified as faulty or worn during the inspection.

Additionally, due to the size and weight of equipment, there are logistical challenges in safely storing and handling machines that are in parts awaiting approval for works/repairs or replacements to be completed. So from the time the quote is provided, we offer a window of 48 hours to accept the quote and continue with the works, or reject quote.

Please note if the Quote is rejected we will charge an additional \$50 to re-assemble the machine ready for return. Otherwise if preferred, you can collect the machine in the disassembled condition.

A purchase order will be required prior to inspection

We appreciate your understanding and are happy to assist further should you have any questions.
